

K-love (91.3) in the San Antonio Area is the only station that I know for sure is safe form my kids at all times. My entire family enjoys listening to the music and I would really appreciate it if everything possible was done to keep this station on the air. I stopped listening to other stations because of the language and sexually implications. I don't want my children to hear that. K-love is safe for my kids to listen to. The music lifts them up. Please do not take K-Love off the air.
